Quality. Service. Sustainability.
Packaging for the Next Generation.

4.5838"

The Total Package.
At AMGRAPH, we're committed to delivering excellence in quality, service and value to our customers every day. We understand the importance of keeping costs down. And we understand down-time is costly and unacceptable. Our statistical process controls enable us to understand and reduce process variation, and ensure our packaging meets your requirements. That's why our customers depend on us to meet their stringent packaging specifications even when our competitors cannot.

Sustainability: Packaging for the Next Generation.
Equally important, AMGRAPH is committed to sustaining our earth's natural resources. We provide our customers with packaging that meets or exceeds the strictest sustainability guidelines and we take our commitment to the environment one step further. At AMGRAPH, we've built our business on environmental stewardship: clean air and water, reduced dependence on natural resources and sustainable packaging. Our customers can rest assured their packaging will meet the needs of the next generation.

Capabilities
AMGRAPH's offset, gravure and flexographic printing capabilities, coupled with our tandem co-extrusion coating/laminating and adhesive laminating technology, enable us to offer a wide-range of high-quality graphics and sophisticated structures, for all flexible packaging applications.
